# Inspiration

**For everything there is a season: time to plant, and time to harvest. Never let yourself to be out of season.**

**Je třeba žít tak, jako bychom měli zítra zemřít: tedy naplno a v duchu Má dáti-Dal. Je třeba se učit tak, jako bychom měli žít navždy: tedy naplno a do posledního dechu.**

# M. Zelený: The mobile society

There are several characteristics of the notion of mobility worthy of listing:

- 1. For the first time, the emerging human mobility was massive and realized on a truly global scale.**
- 2. Business and entrepreneurship have become the main drivers of societal change and its dynamics.**
- 3. Mobility has expanded from merely physical objects to ideas, information knowledge, wisdom and digitized coordination. One can be and act anywhere without being physically present.**
- 4. Networks are the new frontier of business organization and management.**
- 5. Outsourcing or global sourcing brings new stability to these networks.**
- 6. Knowledge and coordination functions are mobile and can be outsourced.**
- 7. The engendered new web of global business relations is generating greater stability and weakening the destabilizing influences of traditional politics, religion and national interests.**

# Experience form study in China: Pam Polak

## P. Polak: The tech differently in China

**In China, they have a completely different teaching system. For example, I study Chinese at Southeast University of Nanjing for one semester. I attend 10 Chinese language courses from Monday to Thursday, each course lasting 1.5 hours. If I have to compare it with the school in Vienna, I think it is just as demanding, with the only difference being that here I come into contact with Chinese even when talking to the maintenance man at the boarding school.**
